## PROFILE

Goal-oriented Computer Science student with a specialized diploma in Web Development, showcasing a strong commitment to excellence, teamwork, and continuous learning. I excel in a group setting by leveraging my effective communication skills and taking initiative. Ready to bring a combination of technical expertise, enthusiasm, and adaptability to contribute to innovative projects and make meaningful contributions to the field.

## WORK EXPERIENCE

### Front desk employee

Goodlife Fitness

2020-2021

- Greeted visitors and customers upon arrival, offered assistance and answered questions to build rapport and retention.
- Used **internal software to process reservations, check-ins, and check-outs** over the phone.
- **Used internal software to help over 20 customers with payment plans, and payment problems daily.**
- Delivered above-and-beyond service to guests by making outside venue reservations and setting up tours.
- Maintained cleanliness and organization at the front desk area, ensuring a tidy and professional appearance.
- **Assisted in resolving membership issues**, offering solutions, and escalating concerns to management when necessary.

### Camp Counsellor

Code Ninjas

2021-2023

- **Developed and implemented curriculum** tailored for various age groups and skill levels in coding and technology.
- **Organized and led coding events and projects**, facilitating a creative and collaborative environment for children.
- Managed groups of children during camp activities, ensuring a safe and engaging learning experience.
- Conducted meetings with parents to discuss their children's progress and future opportunities in technology and coding.
- Planned and **coordinated events for parents**, showcasing the projects and work their children have completed during the camp.

### Programming instructor

Code Ninjas

2021-2023

- **Provide updates at daily standups** to company leaders, work in progress, challenges that need attention, and potential improvements to the curriculum.
- **Educate students** on foundational programming concepts, including memory utilization, object-oriented programming, Logic, and flow control.
- Use log and error message analysis to **identify and resolve** bug issues in code.
- **Create, organize, and teach** the fundamental of programming and problem-solving techniques using
- JavaScript, Lua and C# to **over 40 students daily.**
- Create interactive lessons and exercises, that fully engages and challenges students of varying ages and skill level.

## CORE CONCEPTS

### Data structures

Using C learned complex and basic data structures, like binary heaps, graphs, BST's, AVL trees Hash tables, learned about their implementations, time and space complexity and application

### Object Oriented programming

Using Java learned about the core concepts of object oriented, encapsulation, polymorphism, inheritance.

### Databases

Excellent understanding of database concepts such as relational database design, relational algebra, transaction processing and concurrency control.

---

## EDUCATION

Computer Science

**Wilfrid Laurier University**

2023- ongoing

Web application and Development

**Fanshawe College**

2020-2022

---

## Office administrator

Code Ninjas

2023

- Walked parents through the coding curriculums offered, explaining the skills and technologies taught.
- **Assisted parents in selecting appropriate payment plans** to meet their budget and their children's learning needs.
- **Scheduled children for classes**, ensuring a balanced enrollment and optimal class sizes.
- Handled phone inquiries, providing information, and resolving any issues related to the curriculum, scheduling, or payments.
- **Utilized Excel to maintain and display detailed records** of students needing additional attention, facilitating targeted support by the teaching staff.
- Responsible for opening and closing the center, ensuring the facility was secure and all operational procedures were followed.
- **Delegated tasks to coworkers** enduring, the daily standards were met.

## PROJECTS

### Craft | ReactJS application with firebase

- Designed and created a React application where users could post do-it-yourself projects.
- **Created database** where users and posts information could be stored.
- Implemented authentication using firebase authentication services.
- Implemented user blocking functionality allowing users to selectively block other users within the application
- Designed and implemented posts deletion features allowing only verified users to delete their past posts within the application.
- Implemented a feature enabling users to follow and view a dedicated page displaying posts from other users they follow.

### Gift Smart| ReactJS application with firebase and google search API

- Developed a React-based application, "GIFT SMART," that intelligently generates personalized birthday gift suggestions for users.
- **Structured a comprehensive 'People' database**, incorporating attributes such as name, date of birth, and personal interests.
- Integrated Google Search API to dynamically fetch and present relevant gift ideas based on the recorded interests of each individual.
- Implemented authentication using firebase authentication services.
- **Developed priority** to individuals based on the proximity of their upcoming birthdays relative to the current date.
